This entry level position is not strictly a "programming only" position, however the a very strong programming foundation is a must. New employees are trained and expected to learn the specialized skills to become a Security Expert.

Identity & Access Management Consultant

Sath Technologies has an immediate opening for an Identity & Access Management Consultant role in Kolkata, IN. Sath Identity & Access Management Consultants work with clients from leading organizations across diverse industry sectors including food & beverage, healthcare, fashion apparel, energy as well as municipal, state and federal levels within the public sector to provide consulting on cyber security and Identity & Access Management projects. This role will work with team members, client stakeholders and individually to support IT audit efforts, promote best practices, and ensure compliance efforts are being met.

An average week as a Sath IAM Consultant requires a blend of technical skills, creativity, and attention to quality to serve our demanding clients. Individual will be responsible for software design, development and testing, and documentation. Additionally, this individual must be a highly motivated team player that will ultimately join our I.T. department and assist us with several, mission critical applications. After a successful completion of the training program, the individual will be moved to a full-time Software Developer role. It may also include involvement in software architecture, design, and functionality analysis. This individual will be required to plan their scheduled activities to ensure that deadlines are met while building in time for unscheduled, ad-hoc client request that will occur.

To be successful in this role an individual will be required to have:

- Bachelor's degree in Computer Science or equivalent is required.
- 1 – 5 years of experience in Identity & Access Management.
- Well versed with OIM components like Remote manager, Connector server, OIM HA Architecture Admin and managed servers
- Hands on SOA experience developing custom provisioning and approval workflows.
- Having ADF customization experience with OIM 11gR2 is a bonus.
- Hands-on design, implementation, configuration, integration, and deployment experience with Oracle Identity Manager (OIM) 11g R2
- Provide subject matter expertise on Oracle Products in IDM field.
- Can assist other team members and peers within other technology teams
- Excellent verbal and written communication skills. The person will have to communicate with stakeholders to get technical details
- Excellent analytical skills. The person will be expected to come up with solution for business requirements.
- Excellent grasp on Oracle databases and queries.

- Develop and direct software system testing and validation procedure, programming and documentation

Desired Development Skills:

- Understanding of Core Java, Servlet, Jsp
- Oracle SQL, XML, Webservice
- JSF, Hibernate, SAML, LDAP

Though not required, the following experience would be helpful:

- Familiarity with Single Sign-On (SSO), portal, federation, and security concepts (SAML).
- Experience with other programming languages and Application Servers a plus

Career Path:

If you're the type of individual that like to work with various professionals to identify and solve complex problems, Sath Technologies can offer a career path to high demand roles of Cyber Security Analyst, Enterprise IT Auditing, Senior Business Analyst or IT Project Management and ultimately become a Sr Identity & Access Management Consultant and subject matter expert (SME).
